

Calculating GPA. Grades are needed for all courses, including transfer courses; to calculate psychology GPA, only use the grades earned in your psychology classes.

University Grading System

Only letter graded courses receive a numerical value.

A+	= 98.3	C-	= 71.7
A	= 95.0	D+	= 68.3
A-	= 91.7	D	= 65.0
B+	= 88.3	D-	= 61.7
B	= 85.0	E+	= 58.3
B-	= 81.7	E	= 55.0
C+	= 78.3	E-	= 51.7
C	= 75.0	F	= 45.0

Converting Grade to Numeric Value. The grade needs to be converted to its numeric value and then multiplied by the credit value of the course. You then sum these computed values for all courses and divide it by the sum of the credits.

Example:

Psyc 111, A for 1.00 credit = $95.0 \times 1.0 = 95.0$

Psyc 115, B for .5 credit = $85.00 \times .5 = 44.5$

Psyc 201, B+ for 1.5 credit = $88.3 \times 1.5 = 132.45$

The sum of above calculated course value is 271.95 you divide this by the sum of credits 3.0 which give the GPA of 90.65 for the three courses.
